

# The Original BD Exhaust Brake

Increase your driving confidence and towing safety with the superior retarding performance of the original BD Brake. Incorporating BD's exclusive Variable Orifice Technology, the BD Brake provides up to 150 retarding horsepower throughout the engine's RPM range—not just at high rpm like other brands.

The rugged, cast-iron housing incorporates BD's exclusive alumibronze bushing and piston ring-sealed, stainless steel butterfly shaft that has proven to stand up under the harsh, high-heat conditions of the exhaust environment. The BD Brake is the most widely-recognized exhaust brake in the industry for one simple reason: It's the best.

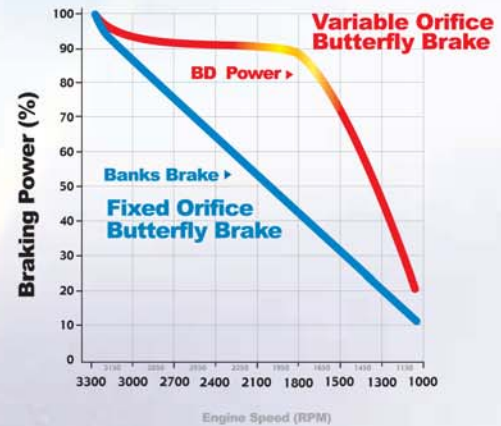

Designed for the  
**6.0L PowerStroke**

◀ Compressor/Vacuum Pump included in most kits

Designed for the Ram  
**Cummins**

## BD Exhaust Brake Features

- The exclusive BD alumibronze bushing and a stainless steel shaft that incorporates 3 piston rings prevents exhaust leakage and the butterfly shaft from sticking open or closed.
- BD's butterfly, rotating shaft, levers, brackets and all mounting hardware are made of corrosion resistant stainless steel.
- BD's spring loaded air cylinder ensures the butterfly always returns to the open position and the quick release valve is designed for a smooth butterfly opening cycle.

### Notes:

- (9) Automatic Transmissions – For best retarding results use a TowLoc, AutoLoc or TorqLoc on page 6  
 (10) 1989-1998 12-valve engines require 1030060 exhaust valve spring kit  
 1989-1993 turbo mount brakes require 1040050 down pipe kit  
 1996-1998 "California" spec engines with EGR require 1030030 Kit  
 (11) Dual Alternator equipped Duramax engines with Automatic Transmission add DA behind part number

Designed for the GM  
**Duramax**
